

Mahek Panchal . Jarvis Consulting

I'd describe myself as an inquisitive individual always eager to embrace new knowledge. I completed my bachelor's in Computer Engineering at LJET and pursued a postgraduate certificate in Web Development at Conestoga College. During my two years in Canada, I've welcomed various part-time roles, refining my interpersonal and communication skills. While I have experience in development, I'm eager to take on fresh challenges. In my final year of undergrad, I embarked on an internship at Softvan, where I engaged in hands-on projects, collaborated with diverse teams, and delved into new frameworks like Spring Boot and Tensorflow. This opportunity polished my current skills while broadening my expertise across different tools and tech.

Skills

Proficient: Java, Linux/Bash, RDBMS/SQL, Agile/Scrum, Git

Competent: Docker, HTML, Javascript, CSS, Google Cloud Platform, Postgres

Familiar: Tensorflow, Springboot, AWS Services, MongoDB, Express, React, Nodejs, C++

Jarvis Projects

Project source code: https://github.com/jarviscanada/jarvis_data_eng_MahekPanchal

Linux Cluster Resource Monitoring App [GitHub]: Developed a Cluster Resource Monitoring Application using Linux CentOS. Created bash scripts capable of retrieving hardware specifications and node resource usage. Real-time data was gathered using the crontab feature and stored in a Postgres database deployed within a Docker container.

Highlighted Projects

Influencer Management System: Created a user-friendly web application that enabled influencers to easily access information from the portal and create compelling content for impactful marketing campaigns endorsed by the registered brands. Deployed an Influencer Management System based on the MERN, utilizing AWS EC2, S3, and SNS services. Executed thorough threat detection and analysis, detecting and analyzing user behavior patterns among registered influencers to ensure robust system security and integrity.

Hygiene Surveillance: Built a strong Hygiene Surveillance system using Java to check if restaurant staff were wearing gloves and masks during COVID. Used TensorFlow and computer vision to create an accurate hygiene surveillance system and trained AI models using deep learning.

Professional Experiences

Software Engineer, Jarvis (2023-present): Engaged in several projects, boosting my technical expertise. Adopted an agile approach for project sprints. Expanded my skill set by learning new languages and frameworks such as Bash, Docker, and SQL, and diligently maintained updated source code for each project using GitHub.

Software Development Intern, Softvan (2020-2021): Collaborated with a team of developers to optimize system performance through efficient software development life cycle management. Implemented software engineering patterns to recognize and resolve issues, leading to reduced debugging durations. Conducted daily scrum meetings to ensure transparent communication and on-time task completion. Worked closely with stakeholders to enhance user experience and system performance.

Education

Conestoga College (2021-2022), Post Graduate Certificate in Web Development, Computer Engineering - GPA: 3.61/4.0

LJ Institute of Engineering and Technology (2017-2021), Bachelors in Computer Engineering, Computer Engineering - GPA: 8.72/10.0

Miscellaneous

- Worked as a BOD for Women Empowerment at Rotaract Club of Ahmedabad Midtown
- I enjoy dancing and have performed in classical dance shows

- I like swimming on weekends,it helps me stay fit and composed
- I competed in badminton at the district level.
